SOMERSET'S

Chrysanthemum

and

Carnation Cuttings

SOMERSET ROSE NURSERY, Inc.

P. O. BOX 608

NEW BRUNSWICK, NEW JERSEY

WHEN ORDERING MUM CUTTINGS

Please indicate the earliest date delivery will be acceptable and the maximum number of cuttings that can be handled in a single shipment.

To serve you best, it is necessary that we have your order at least a month in advance of requested delivery date, although often it is possible to make shipment on short notice.

Where we are unable to ship very close to the requested delivery date, we will advise you of our growers best estimate of delivery. We suggest you advise whether substitutions will be acceptable when giving the order.

Certain important varieties are not included in the listings in this catalogue because of shortages of satisfactory stock plants. Many of these varieties are available and upon inquiry we shall be glad to advise you if they can be obtained.

TERMS OF SALE

ON CHRYSANTHEMUM VARIETIES LISTED IN THIS CATALOGUE

Fifty rooted cuttings of a variety is the minimum that can be supplied. More than 50 of a variety must be in multiples of 50. There is no restriction on the size of orders.

Unrooted cuttings can be furnished. For less than 500 of a variety they are priced the same as rooted cuttings. 500 to 950 of a variety 50 cents per 100 less than rooted cuttings. 1000 or more of a variety \$1.00 per 100 less than rooted cuttings.

Quantity discounts cannot be allowed, regardless of size of order. Shipment will be sent Railway Express unless otherwise instructed. Otherwise terms are as listed in our regular catalogue.

CHRYSANTHEMUMS EVERY MONTH

Fundamentals of successful Chrysanthemum culture will probably remain the same, except, as more progress is made, probably we will see more gravel culture. Improved insecticides and new methods of culture are all helping to improve the quality and increase production.

Dr. Kenneth Post, through experiments at Cornell University, proved it was possible to produce cut chrysanthemums of good quality at any time during the year, by the use of lights and shading. Included, in the following pages, is a flowering schedule of preferred varieties covering the entire year.

Our propagators are arranging to have cuttings available throughout the entire year for those who wish to follow this program.

Hardy garden varieties will be listed in our General Catalogue. The varieties in this catalogue are primarily for cutflower purposes however practically all varieties flowering before October 15th are suitable for garden use.

1948 INTRODUCTIONS

Yellow Queen

(Yoder Bros., Inc.)

Yellow Sport of Orchid Queen — November 10

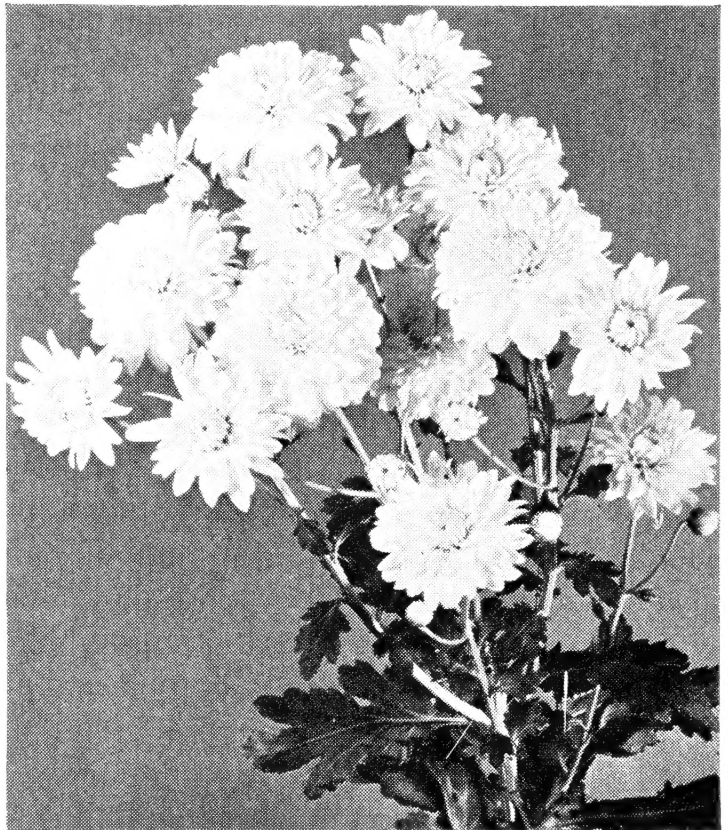

Highly recommended for natural flowering and delayed flowering into Thanksgiving season by the use of artificial light. \$8.00 per 100.

Constellation

(Yoder Bros., Inc.)

Yellow Decorative—November 5

The two outstanding features of this variety are its uniformity in response to black cloth shading and its dependability as a high producer of quality flowers. Constellation has consistently yielded as high as the most productive of the commercial varieties. With the use of light and shade we recommend this variety for flowering from May 5 to November 15. \$8.00 per 100.

Constellation

Dark Pink Orchid Queen

(Delworth) 1947 Introduction

An intense mauve pink sport from Orchid Queen with the added attributes of increased vigor in both plant and flower. The importance of its value over its parent for early shading has definitely been proven. Introduced last season, it was well liked by most who grew it. Price \$7.00 per 100.

1948 INTRODUCTIONS

Tally-ho

(Yoder Bros., Inc.)

Yellow Intermediate Pompon — November 15

A quality pompon. It is very similar in many respects to the variety Princeton and complements this variety in being a clear yellow and a well-rounded hard pompon. \$8.00 per 100.

Seneca

Seneca

(Yoder Bros., Inc.)

Orange

Bronze Decorative—November 1

The earliest bronze pompon in the cloth house shading program. It holds its color well. It is a better producer than Navaho. It is the most reliable bronze pompon for early shading. \$8.00 per 100.

GARDEN VARIETIES

Honeycomb

(Yoder Bros., Inc.)

Yellow Pompon — September 25

A small, perfectly formed pompon of intense golden yellow. The flowers are borne on well formed sprays, nearly ideal for cut flowers of medium 18-22" stems.

Honeycomb is a marked advance over the widely grown and well known Early Yellow and Pomponette in that the habit of growth is more vigorous and productive, the flowering season is equally early and the quality and color of the flower is such as to closely rival many greenhouse grown counterparts. Honeycomb will shape up to a fine pot plant or add a distinctive note of formality and rich color to the fall garden scene. \$8.00 per 100.

1948 INTRODUCTIONS

GARDEN VARIETIES

Serenity

(Yoder Bros., Inc.)

White Daisy — September 25

The major requirements of a good garden chrysanthemum are early, showy, flowers borne on rigid, compact, bushy plants. A degree of resistance to frost, winter kill, insects and diseases is equally desirable. Serenity combines all of these qualities plus a uniformity of growth and flowering seldom exceeded by an outdoor chrysanthemum. It is a beautiful creamy white, heavily petalled daisy that opens rapidly to a real show of literally hundreds of blooms. As a pot plant, it resembles the bushy compactness of Judith Anderson and Pomponette. The shapely plant, because of its strength and rigidity makes a beautiful border or low hedge. \$8.00 per 100.

Spellbound

(Yoder Bros., Inc.)

Lavender Pink Decorative — September 25

A striking 3 inch decorative that combines the beauty and grace of Lavender Lady with the durability and substance of Jean Treadway. Spellbound captivates the eye with its gloss and finish derived from Burgundy. The plant is a solid, compact bush attaining a height of 24 inches. The characteristic, uniformly planed flower development contributes to a wonderfully showy mass effect that cannot fail to greatly enhance the early fall garden. The habit of growth is equally ideal for pot plant culture. \$8.00 per 100.

The English Hardy Mums

We call your particular attention to this fine class offered in our general catalogue. Excellent for cut flowers both in spray form or disbudded. For outdoors and under glass.

Our selection includes the best in this class, and, for the florist or nurseryman that wants something unusual and different, both for cut and garden decoration, we cannot recommend them too highly.

Tally-Ho

PRICE LIST

LARGE FLOWERING

Please note carefully instructions and terms of sale on inside front cover.

Order not less than 50 of a variety and in multiples of fifty.
There are no restrictions with regard to size of total order.

BIRD PLANT BANDS

Are ideal for Carnations and Mums. They are nutrient treated and are being used by most successful growers. Two types are available, Vita Band 10 for up to 12 weeks and Vita Band 40 for longer periods. They are economical too.

Order Early — To deliver rooted cuttings in prime condition calls for careful planning on the part of our growers. They always grow a surplus but orders are filled in rotation as they are received. There are times when it is a human impossibility to fill all orders received for delivery on a certain date. Naturally early orders get preference.

SOIL STERILIZATION IS A GROWING PRACTICE

Steam is the ideal agent for this purpose but it is not always available and it is difficult to use. Many chemicals are available for soil sterilization. Where disease organisms are to be controlled Formaldehyde is a reasonable and effective material. Combined with Carbon Bisulphide it is effective against insects and weed seeds also. Chloropicrin is effective against most insects, weed seeds and some diseases. Dowfume G is fine for nematodes and some insects and has the advantage that the ground may be planted only a few days after treatment. We can supply all of these materials. Let us help with your problems.

* Symphony. Reddish purple stripes on a delicate mauve background make an unusual color, of the type in demand. Flowers are larger than average with medium length stiff stems. Production is good the entire season, even in the field.	20.00	150.00
* Yellow Gold. A good clear yellow with more than average sized flower.	12.00	100.00

Varieties marked * are patented. Agreements must be signed.

*Insecticides - Fungicides - Fumigants
for the florist*

We carry a complete line. Probably we can help you with your disease and insect problems.

P-40. (Sodium Selenate.) Controls Red Spider, thrip, midge, leaf nematodes. 25 lbs. \$4.25; 100 lbs. \$15.00.

Loro. Well known popular spray for Mums, Carnations and other plants. Controls aphids, spider, thrip, midge. Pint \$2.00; 1 gal. \$10.50.

D N Dust No. 10. Controls spider mite, thrip and rust on Carnations. 10 lbs. \$3.50; 50 lbs. \$12.50.

D N Dust No. 12. May be used on Snaps, Mums, Roses, etc., to control spider, thrip and rust. 10 lbs. \$4.50; 50 lbs. \$20.00.

Fermate. Excellent fungicide, controls many diseases. 3 lbs. \$2.70; 25 lbs. \$18.75.

Sodium Selenate has proved it has a definite place in the growing of mums and carnations. The most popular form is the P-40 because growers find it easier to apply. The recommended dosage is 3 lbs. per 100 square feet applied after the plants are well established. It is not a cureall but rather acts as a watchman. Careful growers still maintain a regular spray schedule. This material is priced as follows:

25 lb.	\$ 4.25	50 lb.	8.00
100 lb.	15.00	500 lb.	70.00
1000 lb.	130.00	2000 lb.	250.00

BIRD VITA-BANDS

Vita-Band 40: Growers are reporting outstanding results in vigorous well-balanced growth. Exclusive nutrient treatment affords a liberal supply of balanced plant food. Transplanting shock eliminated, saving 1 to 3 weeks set-back. Sturdy fibre resin construction maintains best moisture conditions with watering frequency cut 50%. Save space and growing time. Quick set-up and rapid removal.

Vita-Band 10: Designed for growing periods of 8 to 10 weeks. A low-cost nutrient treated band especially good for annuals and vegetables. Produces growing results similar to Vita-Band 40.

Prices per 1000—Sold in units of 1000 only

Our Croft Lilies came from this field in Oregon. Note the uniformity and the extra large bells.

We can supply, in season, American grown Iris Wedgewood, Freesias, Callas, Ranunculus, Anemones, etc., and we would be glad to have an opportunity of supplying your requirements in these as well as imported Dutch bulbs.
